

**We-Delfino 型號**

Width (寬度)	890 mm
Height (高度)	900 mm
Length (長度)	11950 mm
Weight (重量)	180 Kg

- 5.5 hp, 4 stroke engine c/w revolution regulator and super-silenced muffler.
- Working depth from 0 - 10 cm, working width: 75 cm.
- Cleaning performances: 2500 m<sup>2</sup>/h.
- Oil bathed transmission c/w clutch.
- Equipped with separate fast disengage controls for both sifter and pick-up drum.
- Independent continuous revolution P.T.O shaft for different uses like pump, washing, compressor, electro generator and others on request.
- It is possible to fit a small rear scraper or a small rear rake.

**FUNCTIONING 功能說明**

Delfino is supplied with two types of sieve, one with fine mesh and the other with larger mesh.

The machine is small and self-propelled

The Beach cleaning operates via a loading roller carrying sand and debris in a sieve, of the machine width, with traverse movement, that allows to deposit the debris in a basket of garbage collection and drop the clean sand.

It's very handy and fits well with the cleaning to be carried out in the middle of the umbrellas.

The engine has an oil alert system to facilitate the turning off of the engine in case of a lack of oil

The Beach cleaning is built according to CE norms.
