

Mobile milking trolleys

Basic Line Cows

Welcome to Milkline world and to Milkline Basic mobile milking machines... just connect the plug and start the milking.

Simple

Modern

Reliable

Fast...

With the **Milkline Basic cows** mobile milking trolleys your work will be easier and faster. They will enable you to milk till 32 cows, collecting the milk into 30lt transparent buckets, which allow you to check the production for each single cow. The machines are available also with 25 litres S/S milking bucket.

Reliable...

The sturdiness of frame and vacuum tank (both hot galvanised) guarantees a long life of your investment.

Eco...

The **Milkline Basic cows** mobile milking trolleys enable to produce high quality milk with maximum hygiene, assuring a stress reduction in your herd.

It is possible to carry out very easily a daily washing of the components, which are in contact with the milk. The vacuum pump with graphite vanes does not need lubrication, avoiding in this way working environmental pollution.

All the components are of high quality and are produced with the approval of Health Responsible Organism.
