

Paddy Cleaner

PC-450

KENDING Paddy Cleaners are mainly used in the pre-cleaning process of harvested paddy or for removing foreign matters from rough paddy. Most of the impurities, irrespective of their sizes, are completely removed in different stages of the passage of paddy through fork-like vibrating sieve, scalper, suction fan, and vibrating sieve incorporated in these machines.

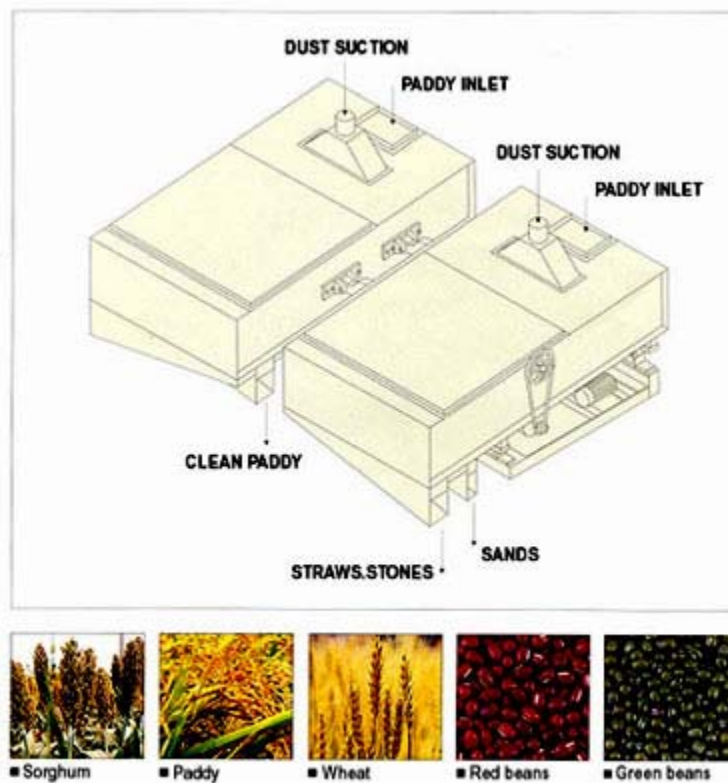

SC-100

The " KENDING " Paddy Cleaner , with the best separating capacity and effect there is, this machine may separate efficiently the alien matters, such as straws, limbs, branches, sands, stones, etc.

This machine is separating efficient for various kinds of grain, namely, paddy, corn, barley, wheat, green beans, red beans, white beans, soya beans, sorghum, etc.

As it is an extremely safe and noiseless model, its operational system can reduce the environment sound pollution. Besides, the unit is blessed with high solidity, practicalness and durability.
