

Paddy Husker

CArBH-10M (Automatic)

CArBH-10K (Automatic)

BS-06L, BS-10L (Manual)

KENDING automatic paddy husker can control the clearance between two rubber rollers automatically with a pressure device. It is more efficient than the traditional machines.

There are many specialities in this machine, such as the control of feeding material, pressure device of rubber rollers, which can adjust itself automatically when paddy is husked and brown rice won't be broken easily. The closed-type machine can enclose all the dust while functioning and keep the factory clean. Thus KENDING automatic paddy husker will save your trouble, money and time, and improve your production.

Specifications

MODEL	REQUIRED POWER (hp)	INPUT CAPACITY (ton / hr)	SIZE OF RUBBER ROLLERS	MEAS. (cft.)
