

One Pass Rice Mill

ADVANTAGE:

The machines are designated for use in a small rice mill or the farming household in general.

FEATURES:

1. The one-pass system that separates the chaffs from the rough rices during hulling and the bran from the brown rices during polishing in complete automation.
2. Highly efficient in hulling and polishing, the machines produce the best white and bright rices.
3. The precision design and the low-cost maintenance required make the machines economical units to serve the best purpose.
4. The machines are easy to operate and service, there are no need for special operators.
5. The machines may be driven by motors or diesel engines.
6. Optional equipment of one oscilating sieve assembled with TC-16 further separates broken rice and bran from white rice.

Specifications

MODEL	REQUIRED POWER (hp)	INPUT CAPACITY (ton / hr)	SIZE OF RUBBER ROLLERS	MEAS. (cft.)
TC-08D	10	0.8 ~ 1	4" x Ø8¾"	52
TC-08	10	0.8 ~ 1	4" x Ø8¾"	52
TC-16	20	1.2 ~ 1.5	6" x Ø8¾"	73
